PROJECT

Project Topic: Babar-Shop Website

Technologies Used: HTML, CSS, JavaScript
Object Notation

Project Description:

The purpose of this website is to provide a platform where barbers and their customers can connect with each other. This will result in efficient use of barber's time as well as will save their customer's time. This website contains the information about the barber shop such as what is the timing and where it is located. It also contains what all services they provide to the customers.
